- Removable, long life battery (up to 10 hours)
- 3 year warranty, including battery

Extraordinary price!

ACHIEVING SUCCESS WITH ProWise CHROMEBOOKS

ELB offers the licenses, services, and support you need to achieve success with your Chromebooks in the classroom.

Chromebook Licenses

To manage and administer multiple Chromebooks, each device needs a license. The license allows access to the Google Management Console.

Chrome Device Management License – Education or Commercial

The CDM License enables management and administration of multiple Chromebooks or users from a single web-based portal. The benefits include:

- Seamless setup for all devices: Centrally set all device settings, proxies and other policies
- 100% cloud-based: Avoid costly local servers or hardware to manage devices and allow users to access their files from any device
- Easily manage student activities: Ability to restrict devices to run only one app, minimizing distractions or cheating
- Remote wipe and lockdown: Ability to lock and remove device data remotely in case of loss or theft

Implementation Services

Our team of experts can provide the services and support you need to safely deploy and manage your Chromebooks for years to come.

Management Console Development and Training

Let our experts help you design and develop your schools' Management Console, a web-based portal which enables you to configure and manage user access, establish user groups, and provide additional security. During this session, your staff will also learn how to administer the portal.

White Glove Chromebook Configuration Service

Let our experts help manage the onsite delivery, setup and configuration of your Chromebooks. We will remove all packaging, configure, test, and register each device on your schools' Management Console. This ensures all devices are ready prior to the arrival of teachers or students.

Asset Identification and Tagging Service

During our White Glove Service, our technicians can also record the serial number and MAC address of every device, as well install an identification tag which can be used for device tracking, management, maintenance and reporting. This information will be provided to you electronically.

Training and Professional Development

Teacher training can help accelerate adoption and improve effectiveness of Chromebooks in the classroom. We can help.

Chromebooks and GAFE Training

Our education professionals will guide your teachers through Chromebook and G-Suite for Education best practices as they learn to implement both into the classroom. This hands-on training will empower them to create and deliver lessons in new ways, supporting increased collaboration in the classroom.

Technical Service and Support

We offer convenient and comprehensive support options to ensure the long-term success of your Chromebook deployment.

Accidental Damage Protection

For a minimal fee, you can enjoy three years of accidental damage protection. Even though ProWise Chromebooks are ruggedized, in the event one is accidentally damaged, this coverage offers the one-time replacement of that device.

Technical Support

We operate a national, toll-free Service Helpdesk to support the technical needs of all our customers. Whether you need assistance configuring your device, solving a technical difficulty, or answering a product question, our experienced support professionals are available to assist you.
